Connector or Wiring	H7

Electrical Specifications

Input Voltage	12V DC
Operating Voltage	12V DC

Additional Specifications

Warranty	1 Year
Pack Quantity	2 Modules

Installation & Application Information

This product is polarity sensitive meaning the H7 male plug needs to be connected correctly into the original vehicle plug. The product will not function correctly otherwise.

It is suitable for the following vehicles that have very strong CANbus requirements:

- Late model VW Amarok (2019 onwards)
- Holden Colorado & Trailblazer
- Holden VF Commodore
- BMW X5 (E70)

These are the only vehicles that we know absolutely require this harness and that this product fixes the issues with LED bulb products.

If you have a non listed vehicle with issues that aren't resolved using the standard CANbus module (990007CB) please give this product a try and call Invision with the results.
