

PACKAGE CONTAINS

FOR ISUZU D-MAX 2020-2022

1 x easy up strut
(passenger side)

2 x washer

1 x slow down strut
(driver side)

2 x cable

INSTALLATION INSTRUCTIONS

FOR ISUZU D-MAX 2020-2022

01

** Installation begins from the Driver Side **

Remove the steel strap from the body by loosening the bolt (*Yellow*) and remove the rubber (*Green*)

02

Install the slow down strut. Place the cable on first, followed by the washer. Ensure when tightening, the cable is sitting on the shoulder of the bolt and the cable remains free

03

Remove the factory bolt from the hinge closest to the tub and install the strut bracket as shown. Ensure that the lip of the bracket sits under the hinge

04

Remove the steel strap and attach the cable to the factory bracket as shown

INSTALLATION INSTRUCTIONS

FOR ISUZU D-MAX 2020-2022

05

Now you have done the installation for slow down strut. Repeat the same process on the passenger side for the easy up strut
