02

Remove the steel strap from the tailgate (Do NOT remove the bracket)

03

Remove the rubber from tailgate

04

Remove the taillight

# INSTALLATION INSTRUCTIONS

## FOR TOYOTA HILUX 2005-2015

05

Install the slow down strut. Attach the cable on strut bolt first, followed by a washer. Then place the assembly through the factory hole as shown. Tighten up with locknut and washer

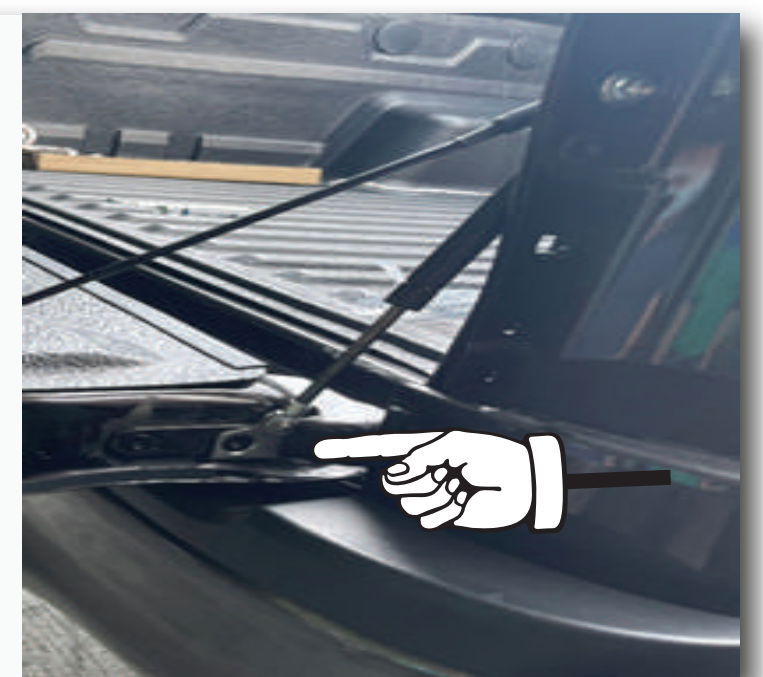

06

Install the new cable on the tailgate at the same position as shown in step 2 and tighten up

07

Remove the factory bolt from the hinge closest to the tub and install the strut bracket as shown. Ensure that the lip of the bracket sits under the hinge

08

Reinstall the taillight assembly. Now you have done the installation for slow down strut. Repeat the process on the passenger side to install the easy up strut
