

New Product Release

XRS™ Connect Touring Pack with GPS

19th May 2023

Introducing the Australian Made XRS™ Connect Touring Pack with GPS, the **XRS-330CTPG**.

The XRS™ Connect Touring Pack with GPS pairs the popular XRS-330C Super Compact UHF CB Radio, with the MC668B-M GPS Microphone, and the ground-independent AE4018BK1 elevated feed antenna, the perfect solution for those users looking for the ultimate communications setup for their 4WD tourer.

The XRS-330CTPG features a professional-grade waterproof and dustproof speaker microphone complete with a built-in GPS receiver, offering true location awareness without relying on a smartphone to provide GPS location data. Also featuring a class-leading 2-watt speaker, customisable buttons, and a high-contrast OLED screen guaranteeing a crystal clear, anti-glare display.

Enabled by Bluetooth® wireless technology, XRS™ Connect is the first of a new generation of connected UHF CB radios with unique features never seen before. They are the first ever UHF CB radios with App control, introducing new features such as creating and sharing scan lists and providing instant access to the entire Australian and New Zealand registered analog frequency database.

As with many other smart devices, XRS™ Connect products are software upgradable via the XRS™ Connect app, keeping users up-to-date with the latest features and technology.

For more information on the XRS™ Connect range of radios, please visit gme.net.au/getxrs

Exclusive to Cooldrive for a limited time.
